Gull Snobar

Associate Software Engineer

Lahore, Pakistan | +92 311 4167260 | gullsnobar07@gmail.com | Portfolio | linkedin.com/in/gullsanobar | github.com/gullsnobar

Summary

Full-stack software engineer contributing to OmniCat, a Shopify SaaS product, at Devyard, with earlier backend API experience at Xpert Prime. Works across React, TypeScript, Node.js, AdonisJS, PostgreSQL and MongoDB, and has integrated AI provider APIs including Google Gemini. Builds authentication, role-based access, billing and data-heavy interfaces, and works with Cypress and Docker. Computer Science graduate (2026).

Experience

Associate Software Engineer Aug 2026 – Present
Devyard *Lahore, Pakistan (onsite)*

- Contribute to **OmniCat**, a Shopify SaaS, working on AI provider integrations and secure credential management
- Work on billing, authentication and admin features for the platform
- Develop quote management features with React, TypeScript, AdonisJS and PostgreSQL
- Render about 3,000 records efficiently in the quote interface using TanStack Virtual
- Support Cypress testing and Docker-based deployment workflows

Software Engineer Intern Dec 2025 – Jan 2026
Xpert Prime *Lahore, Pakistan (onsite)*

- Developed backend functionality for **Project Hub**, an internal project and task management tool
- Built **15+ REST APIs** using Node.js, Express.js and TypeScript
- Implemented JWT authentication and role-based access control for Admin, Manager and Developer roles
- Integrated Next.js UI components with backend APIs within Agile sprints

Frontend Web Development Intern Jun 2025 – Aug 2025
Arch Technologies

- Built responsive React interfaces and reusable components for web applications
- Implemented frontend state management using component-based development practices

Projects

OmniCat – AI Creative Suite for Shopify | *React, TypeScript, AdonisJS, PostgreSQL, Docker* GitHub

- Employer product (contributor): Shopify app with 11 AI tools for content and creative workflows
- Supports multiple AI providers, secure credential storage, login, billing and an admin dashboard

Healio – AI Health App | *React Native, Node.js, MongoDB, FastAPI, Gemini API* GitHub | Demo

- Final-year project: built a five-module health app with an AI chatbot and personal health insights using Gemini
- Designed missed-dose alerts, trusted contacts and OTP login, with English and Urdu support

E-Shop MV – Multivendor Marketplace | *React, Node.js, MongoDB, Socket.IO, Stripe, PayPal* GitHub

- Personal project: marketplace with customer, seller and admin roles and per-seller dashboards
- Implemented real-time buyer–seller chat, Stripe and PayPal checkout and an admin analytics panel
- Deployed using Netlify, Render and MongoDB Atlas

Fellowship

Full-Stack Development and AI Engineering Fellowship Jun – Oct 2025
Dev Weekends

- Completed hands-on projects with MERN, Python, AI, Prompt Engineering, RAG, LLMs and Transformers
- Weekly sessions led by experienced engineers on real-world development, engineering practices and AI apps

Education

University of Education, Lahore 2022 – 2026
Bachelor of Science in Computer Science; CGPA 3.34/4.00 *Lahore, Pakistan*

Training: iCodeGuru Generative AI (2025) | IEC Web Bootcamp

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, SQL
Frontend Development: React, Next.js, React Native, Redux Toolkit, Tailwind CSS, Material UI, TanStack Query/Virtual
Backend and APIs: Node.js, Express.js, AdonisJS, REST APIs, JWT authentication, role-based access control, Socket.IO
Databases: PostgreSQL, MongoDB, Firebase, Supabase
AI Integrations: Google Gemini API, AI provider integrations, prompt engineering, RAG
Testing, Infrastructure and Tools: Cypress, Jest, Docker, Git, GitHub, CI/CD, Postman
